

The Ferguson Ecology Team Video Night

Presents **VIA ZOOM**:

David Suzuki's The Nature of Things:

REBELLION

A unique documentary featuring a one-on-one conversation between David Suzuki and Sir David Attenborough that takes the pulse of our planet and asks whether humans can change their ways in time.

THURSDAY ~ March 21, 2024 ~ 7:00 PM

REBELLION is a crash-course in every social issue that has frustrated and inspired a new generation of activists. There's a sense that this was a straightforward assignment going in – 2019 was the year of Greta after all. And much of the film is wrapped around climate change, with focus on Thunberg, nature filmmaker Sir David Attenborough (who has changed his message from awe over the beauty of nature to alarm at its state of peril), and Gail Bradbrook of the Extinction Rebellion movement that has made headlines with dramatic protests around the globe. But 2020 clearly threw a spanner in the works. All of a sudden, a clear theme was muddled by a pandemic and concurrent global racial unrest following the killing of George Floyd by Minneapolis police. *Rebellion* works to connect the environment and racial injustice into a single issue.
